6 - 6:30 PM - Open House and Q&A

AT THE CITY HALL ANNEX BUILDING, SRQ MEDIA STUDIO
1565 FIRST STREET, SARASOTA, FL 34236

The City of Sarasota Engineering Design Criteria Manual (EDCM) is prepared by the City of Sarasota to guide City Staff, Developers, and Engineers on set design standards for roads, trails, sidewalks, among others within the City right-of-way.

Purpose: Its primary purpose is to establish uniform practices and design standards to ensure that the best information available is applied to project conditions.

Goal: The City is updating the EDCM, last adopted in 2002, to improve the quality of design in the community and support the City's vision for a world-class community and treasured destination, with enduring natural beauty, charm, and diversity.
