

Main Street Visioning

Overview

The Main Street Visioning project is looking to transform Main Street between US 41 and School Avenue into a more welcoming, safe, connected, lively, and attractive hub of commerce and activity by evaluating all aspects of the right-of-way, including but not limited to travel lanes, on-street parking, sidewalks, lighting, and landscaping. Through a community-centered approach with input from residents, business owners, workers, property owners, and visitors the Visioning process will guide the development of a future Main Street that supports and reflects the community's needs and values.

Corridor & Study Area

Main Street Visioning Goals

 ENGAGE	 IDENTIFY	 INVESTIGATE
Develop a cohesive vision by engaging residents, businesses, and visitors.	Enhance safety, accessibility, comfort, and mobility.	Explore opportunities to improve the public realm and streetscape.
